***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: The present invention relates to an audio/visual apparatus, in particular, a digital sound television system that uses a color television to produce digital sound.

The prior art of record in combination or alone fails to teach or suggest these elements of independent claim 8 in combination with other elements. For example independent claim 8 has claim limitations such as: microprocessor unit (MCU) for controlling receiving and displaying of the television picture in response to user's command, processing means for processing sound signal, and CRT scanning means including horizontal scanning means, wherein, the microprocessor unit shuts the television picture down in response to a sound command signal by outputting a control signal to ground base of a transistor for the horizontal scanning means, cutting the horizontal scanning means off, and preventing high voltage from supplying to a second anode of the CRT and the sound signal alone is processed when the television picture displayed by the CRT is shut down.

2. Claim 8 is allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
